INTRODUCTION

Moldovan SMEs hold a major share of 97.4% of the total number of enterprises with a significant contribution to job creation, measured in 56.2% of the total number of employees in the country. Of the total number of SME’s, the biggest share is held by micro enterprises - 75.6%, and the average number of employees per enterprise is only 6 people. At the same time, the economic efficiency of the sector is relatively low as compared with other countries, generating sales of just 31.8% of total revenues on economy. In the last 5 years the number of SME’s is in a constant growth, however has been attested a slight decrease in their share in total enterprises, in the number of employees hired and sales revenue.

Based on these circumstances, we conclude that this sector remains a vulnerable one to economic and political environment uncertainties, needing support for increased performance and competitiveness.

Therefore, the Organization for Development of Small and Medium Enterprises (ODIMM), via its strategic goal and objectives, is empowered to develop and implement programs and tools to support the development of the SME sector in line with market requirements.

Strategic Development Program (hereinafter SDP) is the ODIMM underlying document that complements the strategic planning system in the central public administration authorities (CPAA), ensuring the priority for various objectives reflected in policy documents, as well as identifying gaps in capacity and tools/methods that ODIMM will use to achieve its strategic objectives.

SDP includes other ODIMM commitments and obligations stipulated in various international treaties, but which are not to be found in sectoral policy documents.

SDP is developed for 2016-2018 and will succeed the one for 2013-2015. For purposes of operational planning of ODIMM activities, annual plans that will provide concrete measures to achieve the SDP will be developed, thereby constituting a tool for its monitoring and evaluation.

To align the ODIMM business planning with the budget planning, has been used the budget classification for programs and the draft sector expenditure strategic program (MTBF), indicating the role and responsibilities of the Organization for the achievement thereof.

SDP is the core ODIMM document, which gives rise to all the Organization’s actions over the next three years and therefore represents: (i) the strategic planning tool, (ii) the methods and tools for implementing the objectives and (iii) the internal and external communication tool.

The document focuses on current and potential sector needs and is based on the recommendations of international and local experts. All the divisions of ODIMM and the responsible division under the Ministry of Economy have been involved in drafting the SDP.
ODIMM Mission
Organization for the Development of Small and Medium Enterprises (hereinafter ODIMM or organization) is a public, non-profit institution, founded by Government Decision no. 538 of 17 May 2007, which operates under the Ministry of Economy, in cooperation with other central and local authorities, business associations, business support providers and SMEs.

The Mission: ODIMM is a public institution that develops and implements programs and tools to support the SME sector with the aim to increase the performance and the competitiveness thereof, thus contributing to the country’s sustainable economic development and to creating new jobs.

In carrying out the proposed mission, ODIMM observes with the following values:

- Honesty;
- Correctness;
- Care and respect for customers and partners;
- Professionalism;
- Teamwork;
- Integrity.

ODIMM mission is carried out by the following strategic objectives:

- Creating opportunities for launching and developing successful businesses, particularly in rural areas;
- Formation and amplification of entrepreneurial skills and culture;
- Facilitating the SMEs access to advantageous and diversified financial resources;
- Facilitating the SMEs access to information resources and innovations;
- Stimulating public-private dialogue;
- Promoting the development of business support infrastructure;
- Facilitating access to business advisory services for the purposes of development/growth;
- Developing businesses with high growth potential or those prepared for export;
- Facilitating business linkages for SMEs with large national and international companies.

ODIMM Mandate: the main intervention areas of ODIMM:

- support for the qualitative growth of the SME sector;
- creating and providing support services for SMEs at all stages of development;
- developing new instruments to accelerate the rate of creation of new enterprises, especially in rural areas;
- supporting SMEs with growth potential to access foreign markets;
- facilitating the creation of business partnerships.

ODIMM areas of intervention are diversified, with the possibility of extension, depending on the needs of SMEs.
ORGANIZATIONPROFILE

The Organization is a legal person, has an autonomous balance, bank accounts, including foreign currency accounts, stamp with the State Coat of Arms and the name in the official language of the Republic of Moldova.

The Organization operates combining funding from the state budget and other sources not contradicting the current legislation.

In its work, ODIMM actively collaborates with development partners, such as ministries, public authorities at central and local levels, business support organizations, business associations, business service providers, economic operators from Moldova, organizations representing civil society, international donors and organizations, media outlets.

The functions for the coordination and control of the ODIMM activities reside with the Coordination Council of the Organization. The Coordination Council is composed of seven members: three representatives of the Government (Ministry of Economy - 2 people, Ministry of Finance), two representatives of NGOs representing the interests of small and medium enterprises, one representative of donors and the Director General of ODIMM.

The Coordination Council has the following responsibilities:

a. approves the organizational structure and the employment scheme of the Organization;

b. approves the strategy, annual work programs and annual spending estimate of the Organization;

c. oversees the use of funds by the Organization, according to established destinations and estimate of expenses;

d. approves opening branches and representative offices of the Organization, the estimate of expenses, organizational structure and the plans for the employment of the scripisc staff thereof;

e. approves the establishment of special funds for the purpose of accumulating financial resources to finance the support and development of small and medium enterprises sector.

Organization’s activities are managed by the General Director, who is appointed on a competitive basis, by the Minister of Economy. The General Director shall exercise the following powers:

a) represents the Organization in courts, in relation to public authorities, individuals and legal entities both resident and foreign ones;

b) concludes contracts, agreements, issues proxies, opens accounts with the banks;

c) develops the strategy and work program for the Organization, as well as the annual estimate of expenditure;

d) develops the organizational structure of the Organization;

e) develops and approves of the internal regulation on the functioning of the Organization;

f) submits proposals to the Coordination Council on opening branches and representative organization in the country and abroad, the estimate of expenses, organizational structure and the plans for the employment of the scripisc staff thereof;

g) submits proposals to the Coordination Council on the establishment of special funds;

h) nominates and dismisses the staff of the Organization;

i) establishes, within the approved annual budget and staffing scheme, the salaries for the staff of the Organization;
j) ensures the achievement decisions of the Coordination Council;
k) issues orders that are binding for all staff.

**According to the Regulation of the Organization, ODIMM has the following core functions:**

- analysis of the SME sector and its evolution;
- evaluating the effectiveness of government support of the sector, preparing proposals for the improvement of forms and methods of stimulating entrepreneurship;
- preparing proposals for the improvement of the legislation;
- implementing programs to support SME development;
- facilitating public-private dialogue;
- granting financial guarantees;
- creating information infrastructure;
- contributing to the development of supporting infrastructure for the sector development;
- facilitating the participation in national and international exhibitions and fairs;
- production and distribution of informative material about business opportunities;
- organizing themed events to encourage entrepreneurship and increase their competitiveness;
- provision of consultancy, information and training services for micro-, small and medium enterprises and business service providers;
- attracting and managing donor financial and technical assistance to implement activities in the SME sector, etc..

For purposes to improve the institution, the ODIMM Coordination Council has approved the new **organizational structure** of the institution visits Decision of 19/06/2015.
The functions and activities of the Organization are distributed into eight strategic Divisions that carry out the following basic tasks:

- **Finance and administration Division:**
  - Provides bookkeeping for the Organization;
  - Ensures the planning and management process of the ODIMM annual estimate;
  - Provides financial planning and management for the state programs carried out by the Organization;
  - Ensures the financial control of the implementation of assistance programs and of the budget;
  - Secretariat;
  - Manages the IT network;
  - Provides logistical functions.

- **Division of business support infrastructure:**
  - Manages the MBIN;
  - Contributes to the creation of business incubators, clusters and i-hubs;
  - Assists local authorities with planning and development of the area and with the implementation of projects;
  - Supports and conciliates SME representatives to develop and strengthen their business;
  - Develops new tools for the development of business support infrastructure.

- **Analysis, innovation and training Division:**
  - Analyses the impact of SMEs policy and strategy;
  - Collects and processes information on the SME sector;
  - Develops studies and launches researches for the SME development;
  - Conducts entrepreneurial training courses;
  - Searches, detects and selects innovations, ensures transfer towards mobilizing the innovation potential of SMEs;
  - Develops new programs and mechanisms to promote and support the SME sector;
  - Examines international best practices for SME support.

- **Division for SME funding:**
  - Identifies solutions and opportunities for SMEs to access non-refundable/refundable finance to develop thereof;
  - Provides support SMEs in accessing nonrefundable financial resources;
  - Support SMEs during the start-up period;
  - Monitors the SMEs and gives advice on their economic growth;
  - Identifies and supports SMEs to participate in exhibitions by subsidizing part of the costs.

- **Communication and public relations Division:**
  - Develops and implements the external communication strategy;
  - Promotes the image of the institution;
  - Conducts promotion and media campaigns for ODIMM programs and activities;
  - Maintains close contact with mass media and updates the websites of the institution.

- **Fundraising and international relations Division:**
  - Accesses and attracts grants to strengthen and develop SMEs and ODIMM;
- Contributes to expanding institution’s relations by establishing sustainable international partnerships;
- Maintain permanent contact with donor institutions and with external partners.

- **Credit Guarantee Fund:**
  - Facilitates the access of SMEs to bank loans;
  - Advises SMEs on accessing financial resources;
  - Establishes and maintains contacts with banking and non-banking financial institutions;
  - Identifies best practices in the field of guarantees and develops new SME guarantee scheme;
  - Monitors the SME guarantee and lending.

- **Business Advice and Assistance Center:**
  - Advices on entrepreneurship;
  - Performs organizational diagnosis and identifies the impediments for company’s development;
  - Provides entrepreneurs with information and know-how for accessing and obtaining financial resources for business development;
  - Contributes to the development of entrepreneurship, managerial skills and business management skills.
ODIMM Strategic Development Program for 2016-2018

ODIMM FINANCIAL RESOURCES

ODIMM operates combining funding from the state budget and other sources not contradicting the current legislation. The funds deriving from the budget are directed towards the implementation of state programs to support the development of SMEs. International projects are undertaken for well-defined purposes, based on donor requirements and criteria.

ODIMM administrative budget compiles articles related to employee salaries, taxes paid, bailment expenses, transportation, delegations, telephone, Internet, and procurement of equipment and accessories, i.e.– everything ensuring the efficient activity of an entity.

Planning is done based on the objectives and expected results deriving from strategic documents of the Government and on approved financial means to cover the costs of implementing the activities.

The annual budgets of the Organization, accounted for in the previous years:

<table>
<thead>
<tr>
<th>Reporting year</th>
<th>2013</th>
<th>2014</th>
<th>2015</th>
</tr>
</thead>
<tbody>
<tr>
<td>The total budget (thousand lei)</td>
<td>59405</td>
<td>89496</td>
<td>52000 (70% of the planned budget)</td>
</tr>
<tr>
<td>Including administrative budget (thousand lei)</td>
<td>4428</td>
<td>6221</td>
<td>5759</td>
</tr>
<tr>
<td>Including state programs (thousand lei)</td>
<td>51798</td>
<td>81709</td>
<td>42015</td>
</tr>
<tr>
<td>Including projects (thousand lei)</td>
<td>3179</td>
<td>1566</td>
<td>4226</td>
</tr>
</tbody>
</table>

It is worth mentioning that budgets tend to increase ODIMM by increasing allocations for the realization of state programs, which proves the creation of conducive conditions for SME development in Moldova. 2015 has registered a decrease in the state budget allocations, subject to the economic situation.

ODIMM HUMAN RESOURCES

The ODIMM staff has the necessary qualifications to perform the tasks set, with the possibility to develop their knowledge and skills, following the business needs and new strategic directions of the activity of the Organization.

On 31 December 2015, the ODIMM staff comprised 29 positions filled, divided by staff categories as follows:

- Management staff – 7;
- Executive staff – 21;
- Technical staff -1.

Of total ODIMM employees, 97% specialists have higher education degrees, including:

- 7% - PhDs in economics;
- 57% - Masters Degrees;
- 36% - university graduates.
ODIMM personnel structure by specialty domains:

- Degree in Economics - 21 specialists;
- Law degree - 2 employees;
- Engineer - 1 specialist;
- Specialists in other fields - 4 employees.

Personnel structure by gender:

- 66% women;
- 34% men.

Structure of staff employed according to the seniority in the institution:

- up to 1 year - 7 people;
- 1 to 5 years - 12 specialists;
- over 5 years - 10 employees.

Personnel structure by age:

- before 25 years of age - 1 person;
- 25 to 40 years - 21 people;
- 40 years to 55 years - 4 people;
- 55+ - 3 people.

The average age of ODIMM employees is **36 years**.
## SWOT analysis

<table>
<thead>
<tr>
<th>STRENGTHS</th>
<th>WEAKNESSES</th>
</tr>
</thead>
</table>
| - ODIMM status  
- Budgetary support for achieving the main objectives  
- Strategic planning across the organization / sector / country  
- ODIMM experience accumulated over the years since 2007  
- Transparency in business  
- Financial autonomy  
- Management of a wide range of programs for different categories of businesses and target groups (youth, migrants, women)  
- Support infrastructure in the regions developed through the creation of Business Incubators Network  
- One Stop Shop for consulting entrepreneurs  
- Achieving impressive results following the implementation of support programs  
- Positive image of the Organization among program beneficiaries and development partners  
- Strong and competent leadership  
- Team of competent managers with extensive experience in public service and in the development / implementation of national and international projects  
- Positive, committed, enthusiastic personnel  
- Professional development opportunity  
- Positive working environment and team spirit  
- The existence of a centralized software for ODIMM programs and activities  
- The existence of a material base, relatively sufficient, for providing support services  
- Using the potential of District Councils in supporting SMEs in the territory  
- Promoting and developing entrepreneurship among women and young women graduates via NMPW  
- Maintaining Public-Private Dialogue  
- Collaboration with national and international support organizations  
- Responsiveness to the implementation of | - Insufficient financial resources to carry out the support programs  
- Low level of media coverage for programs and activities implemented  
- The lack of an information system integrated with other organizations holding and owning relevant databases  
- Insufficient Organization focus on businesses with growth/export potential  
- Lack of support programs for SMEs with growth/export potential  
- Shortage of qualified personnel in the field of business consultancy at different stages of business development  
- Insufficient technological/technical endowment of the Organization  
- Excessive burden on the Director General over activities and operational tasks  
- Insufficient capitalization of the business portal potential  
- Insufficient updating of the Organization website in English and Russian  
- The lack of a separate headquarters of the Organization with adequate infrastructure  
- Limited wage level of the Organization's staff  
- Monitoring and evaluation of implemented programs focused largely on quantitative indicators  
- A major dependence on external sources of financing  
- Absence of ODIMM branches in the regions. |
### OPPORTUNITIES

- Promotion Organization by expanding and developing the brand internationally
- Focusing on strategic activities and implementing new priorities
- Active participation in the intergovernmental committees, working groups, conferences, seminars, nationally and internationally
- Participation in the development of sector strategic documents and on submitting proposals to create conducive conditions for SME development
- The openness of the Organization to establish new partnerships and collaborations
- Technical assistance provided by development partners to support ODIMM objectives and priorities
- Access to programs and projects funded by the representatives of donor institutions
- Development of Organization's staff skills in new areas of assistance and support
- Development of new services/complex support instruments for SMEs at all stages of the development cycle, including for the export-oriented ones
- Strengthening cooperation with support organizations in the country and abroad
- Strengthening public-private dialogue with all stakeholders to facilitate the development of a conducive business environment
- Accessing funds from donor organizations for the implementation of new strategic objectives
- Developing new financing platform (venture capital, business angels, crowd funding)
- Maintaining relationships with SMEs throughout their life cycle
- Coordination of advisory services with other agencies / donors

### THREATS / RISKS

- High degree of financial dependence for the implementation of state programs,
- Low level of communication between all actors in support of SMEs
- Exodus of persons/entrepreneurs due to the uncertainty of the situation
- Difficulties in attracting new SME segments to participate in the new support programs
- Unstable financial market
- Halting of some financing for projects initiated, due to the political and economic crisis
- Overlapping of activities addressing SMEs support carried out by different actors
- Unadjusted legal framework for implementing new financing platform
- Frequent legislative changes
- The lack of competent specialists in specific economic fields
- Insufficiency of experts / consultants on the local market
In accordance with the overall situation of SMEs and following the analysis of major national strategic policy documents, ODIMM has identified the medium-term priorities in its field of activity needed to achieve its mission, as follows:

<table>
<thead>
<tr>
<th>Medium-term public policy priorities</th>
<th>Strategic documents</th>
</tr>
</thead>
</table>
and international companies

- SME Sector Development Strategy for 2012-2020;
- Action Plan for the implementation of the SME sector development strategy for 2015-2017;
- National Action Plan for the implementation of DCFTA - part of the Association Agreement Moldova - European Union for 2014 - 2016;
- Policy matrix of the Roadmap for Improving Competitiveness of Moldova;
- Moldova innovation strategy for the period 2013-2020 “Innovation for Competitiveness”.

CAPACITY ASSESSMENT AND DEVELOPMENT

The assessment of ODIMM activity, carried out with the support of World Bank experts, garnered a good rating with an average of 3.7 out of 5 points. However, there are reserves to improve the activities, things understood and promoted by the ODIMM management and employees. A positive aspect is that both ODIMM employees and management have a shared vision regarding the main directions requiring interventions and changes for a more efficient activity.

The assessment of the quality of ODIMM material base, needed for the effective implementation of planned activities, is a satisfactory one. On this chapter it has been found that there are several constraints: (i) in terms of available space (premises); (ii) possibilities for travelling to the regions (the lack of a special means of transport); (iii) a more active presence of the Organization in the localities (does not have a developed network of branches); (iv) limited number of staff to handle workloads at peak or ad hoc requests received from partner organizations; (v) lack of business consultants for businesses at advanced stages of development.

Examining the business service providers market (based on the study conducted by ODIMM in 2015), which is an important resource to support SMEs, allows us to ascertain a discrepancy between demand and supply of consultancy services, proven by the fierce competition in general domains, such as: business plan development, market analysis, feasibility studies, consulting in accounting and legal matters. At the same time, specific areas of advice remain uncovered: certification in quality management, developing or optimizing business processes, implementation of integrated information systems; management of supply and distribution; accessing foreign markets etc.

Although one of ODIMM priorities is to participate in public-private dialogue (PPD), we find it difficult to achieving an effective one, due to the following reasons: low degree of involvement and openness to dialogue by LPA; low-skilled Organization's personnel in the initiating and carrying out the dialogue; insufficient knowledge and skills in negotiations and lobbying with public authorities at all levels; lack of a clear mechanism for monitoring the implementation of the activities promoted by the PPD.

For the planned period, ODIMM provides for the establishment of operational functions of the Organization in accordance with the best practices of SME development agencies from developed countries.
ODIMM strategic functions will be developed over the coming years. They will determine the basic program and necessary services, eg.:

Table: Strategic functions

<table>

</tr>
<tr>
<td>Networking and business</td>
<td>Liaise with FDI companies and large companies in Moldova; contact lists of buyers; identify opportunities for supply; organizing business</td>
</tr>
</tbody>
</table>
Currently ODIMM already provides some of these services. However, it is not providing support focused on sales and marketing, be it at services nationally or export oriented and it is not directly involved in establishing business ties and matchmaking. Training programs are general in nature and are not adjusted for related export category. LGF provides assistance to access to loans, but this is somewhat limited due to the cost of the loans. ODIMM’s new orientation towards the companies with growth prospects requires new tools to provide the reviewed services.

**SUPPORT SERVICES FOR SMEs BASED ON SEGMENTATION**

Segmentation of the SME sector provides a much clearer picture of the various spheres of SMEs and allows determining what is to be done for each. This enables the efficient use of limited resources, but also to set objectives and targets by segments. The table below outlines the different segments of SMEs and the major support services provided by ODIMM.

The segmentation process shall display the following characteristics:

a) SME segmentation will allow the identification of areas with pronounced growth trends, on which ODIMM is expected to focus;

b) Shall be defined a list of services for each segment and ensure that the companies with the best prospects (sales, employment, exports) enjoys adequate support;

c) Serving SMEs with high potential will vary depending on the company’s needs - some export-oriented companies may require limited support;

d) Companies with low development potential and local companies that provide services will receive a basic support, eg. information, action guides or will be geared towards local/regional business centers.

*Table: ODIMM traditional segments of customers and services provided at the moment.*

</tr>
</tbody>
</table>
For the coming years, ODIMM foresees the provision of several services, covering a wider range of segments. These services will be provided directly by ODIMM and/or through qualified service providers to be contracted.

Analysis shows that companies with low growth potential have consumed most of ODIMM time and resources. The Organisation will continue to provide this support, but it will cooperate with other business development service providers for SMEs (Chambers of Commerce, local advisory centres, business incubators, etc.) and will focus its activities mainly on the segments with high growth potential.

MODERNIZATION OF INSTRUMENTS FOR SME SUPPORT

The already existent instruments under ODIMM portfolio will be modernized and adapted to the needs of SMEs with growth trends, as follows:

(a) Loan Guarantee Fund
   ✓ Expanding the range of financial instruments;
   ✓ Streamlined process to issue guarantees (simplified).

(b) Incubators
   ✓ Including a greater number of export-oriented companies;
   ✓ Focus on start-ups with high growth potential;
   ✓ Identifying opportunities to deliver subcontracts;
   ✓ Developing new acceptance criteria in incubators;
   ✓ Support delineation to accelerate enterprises with high growth and export potential.

(c) Training
   ✓ Openness to medium enterprises;
   ✓ Focus on start-ups with high potential;
   ✓ Focus on existing SMEs with high potential in the domestic market;
Focus on existing SMEs with export prospects;
Improving training modules;
Improved monitoring of professionals in business solutions (BSP) providing training/advice;
Encourage feedback on BSP work regarding the level and degree of expertise/specialization;
Coordinating ODIMM experience with other stakeholders who provide training/advice.

(d) National exhibitions

Providing subsidies to “medium” enterprises;
Organizing events to promote SME capacity in Moldova;
Modernization and use as a platform to attract foreign buyers;
Providing significant subsidies for participation (review aid ceiling).

The image contains a table detailing the ODIMM Strategic Development Program for 2016-2018. The table is titled **AT THE LEVEL OF SUPPORT TOOLS FOR SMES** and outlines various initiatives aimed at supporting small and medium enterprises (SMEs) and entrepreneurs. The initiatives include:

- **Developing and implementing new support tools for SMEs**
- **Analyzing and evaluating opportunities to implement new financial instruments to support SMEs**
- **Diversifying support tools for various enterprises. Access to advantageous financial resources**
- **Implementing alternative financing instruments for SMEs (multi-funding platform, venture capital, business angels)**
- **RM SMEs have access to at least one multi-funding platform**
- **Application of new financial instruments for SMEs**
- **SMEs harnessing new forms of financing on the RM market**
- **Support in developing the legislation on alternative financing instruments**
- **Developed legislative basis for implementing alternative financing instruments.**

The table also includes a column for legislation related to entrepreneurship.

</tbody>
</table>

In order to ensure the achievement of objectives in the Strategic Development Plan for the period 2016-2018, a gradual increase of ODIMM budget by about 30 million Lei per year is required.
MECHANISM FOR MONITORING AND EVALUATION

Monitoring is a regular review of progress in implementing the objectives/actions. This process will be based on actions included and results proposed under the Annual work plans, which in turn arise from SDP goals. Regular monitoring reports will be compiled on a quarterly basis to identify the degree of achievement of annual results and the need to perform corrective measures over the ensuing period.

Monitoring and evaluation of ODIMM’ activities will be performed by an appointed, dedicated person responsible for the M&E. This person will be subordinated to the Analysis, Innovation and Training Division and will work in coordination with all ODIMM’s divisions. M&E person will be responsible for the analysis of relevant information collected from different departments, will develop reports and compile them into the organization’ M&E report. ODIMM management will ensure that all relevant divisions of the organization provide qualitative data to this person.

SDP monitoring and evaluation will be accomplished through reports to the Annual Action Plans of the Organization, which will contain the results and impact indicators. Additionally, at the end of 2018 shall be drawn up a document that will sum all the ODIMM achievements during the implementation of SDP 2016-2018.

Where monitoring process identifies the need for corrective measures, this shall be included either in the plan of the Organization for Development of Small and Medium Enterprises for the following year, or changes are provided to the Strategic Development Program.

The annual assessment will be carried out under the Annual Plan of the Organization for Development of Small and Medium Enterprises and will result in the Annual Report of ODIMM activity evaluation. The report will be placed on the Organization website [www.odimm.md](http://www.odimm.md). Upon the possibility, it will be translated into English and/or Russian.

The system for the assessment and monitoring of ODIMM programs - ArcGIS (Geographic Information System) is a tool for mapping and analysis of GIS maps, has the ability to collect data via forms, viewing, editing and analyzing data, creating applications, etc. ArcGIS tool allows the generation of daily reports and data visualization, which helps prompt decisions.

The annual assessment Report will indicate the achievements and failures on the implementation of the annual plan and the achievement of annual results (indirectly, SDP goals). It will be a more detailed analysis than just monitoring because it will identify the reasons/factors that influenced the success or failure of the achievement, in order to propose more substantial corrective measures for the next year. Moreover, the assessment process will identify both the matters of objectives achieved in the previous year as well as those to be planned for next year. To this end, the evaluation Report will present the basis for the planning activities for the next year (annual Action Plan). The Report will possibly indicate the need to amend SDP Objectives, shall the circumstances change.

Final evaluation of the SDP will be conducted at the end of the third year of implementation and will serve as a basis for drawing up the next SDP. The purpose of this assessment is to identify the level of achievement of the SDP Objectives, the impact following the achievement thereof, the changes
that have occurred due to solving existing problems, etc. Moreover, the final evaluation will include the analysis on the general contribution of the Organization for Development of Small and Medium Enterprises to accomplish the program (sectoral) goal by attaining SDP Objectives and recommendations for the next SDP.

The final evaluation of SDP will include the results of internal and external consultations to obtain the opinion of outsiders and to ensure a more objective and impartial assessment. Part of the evaluation process shall be involved, if needed, external experts.
The proposed organizational structure of ODIMM
